DETAILS & RESULTS

Description One transparent gemstone
Weight 1.107 ct
Measurements 6.35 x 5.35 x 3.52 mm
Shape Cushion
Identification Natural S A P P H I R E
Colour Vivid Pink

Comment: No indications of heating

Geographic Origin: Mozambique
Sapphire from Mozambique formed ~600 m.y.a

Fluorescence : Strong

Rough Sapphire Testing by Bellerophon | Gemlab

Date of testing : June 14, 2024
Weight: 2.896 ct
Measurements: 10.07 x 7.22 x 3.95 mm

According to documents of "Fura Gems", the rough sapphire described above, was mined in its deposit in Mozambique. It was auctioned in Bangkok in May 2024.

The consistency of the analytical data collected during the examination of the rough sapphire and the faceted stone, as well as the comparison of their inclusion scenarios provided sufficient evidence to conclude that this stone was cut from that rough piece.
